

# The Effects of Aqueous Ozone on Bacteria & Viruses

Aqueous Ozone: the Better Way to Clean and Sanitize

## WHAT IS AQUEOUS OZONE?

Aqueous ozone (AO) is a product of water and air in the presence of electrical charge. The electrical charge creates one of the most powerful oxidizers on the planet, revolutionizing the way people clean, deodorize and sanitize spaces. When produced by EnozoPRO, AO is produced in controlled concentrations and contains no harsh chemicals, fragrances or dyes. Toxicology studies have confirmed there is minimal exposure risk using EnozoPro as directed. This means fewer hazards for your workers, clients and facility while protecting your indoor air quality.

MICROORGANISM	CONTACT TIME	REDUCTION
E. coli	30 Seconds	99.9%
Staph A.	30 Seconds	99.9%
MRSA	30 Seconds	99.9%
Salmonella	30 Seconds	99.9%
Pseudomonas A.	30 Seconds	99.9%
Listeria	30 Seconds	99.9%
Enterococcus faecium	30 Seconds	99.9%
Klebsiella pneumoniae	30 Seconds	99.9%
Enterobacter aerogenes	30 Seconds	99.9%
Bordetella bronchiseptica	2 minutes	99.9%
Clostridium difficile	2 minutes	99.9%
Fusarium solani	30 Seconds	99.9%

## WHY AQUEOUS OZONE IS BETTER

- Up to 5,000 refills using one bottle of EnozoPRO
- Doesn't leave behind any harmful residues or by-products
- Reduces skin, breathing and eye issues compared to other cleaners
- Uses regular tap water; no additional chemicals, perfumes or dyes
- Inhibits the growth of microbes in just 30 seconds

Save time, save money  
and improve workplace  
health using aqueous  
ozone

## AQUEOUS OZONE IS CAPABLE OF KILLING 99.9% OF THE MOST HARMFUL BACTERIA:

- E. coli
- Salmonella
- Listeria
- Pseudomonas aeruginosa
- Bordetella bronchiseptica
- Legionella
- MRSA
- Klebsiella pneumoniae
