

## **Florida Tech Company Donates Antibacterial Devices to Bay Pines, FL VA Hospital**

*Enozo Technologies, Inc. Donates EcO<sub>3</sub>Ice Antibacterial Ice Protection Devices to the VA's C.W. Bill Young Medical Center in Bay Pines, FL to Help Stop the Spread of Infectious Diseases*

**May, 2020** – (TAMPA, FL) – On May, 2020, [Enozo Technologies Inc.](#) of Bradenton, FL will donate EcO<sub>3</sub>Ice antibacterial ice protection devices to the VA's C.W. Bill Young Medical Center in Bay Pines, FL. Enozo Technologies, Inc. specializes in creating state-of-the-art sanitizing and cleaning devices for industrial and consumer use.

Enozo's EcO<sub>3</sub>Ice device uses a unique, diamond-based technology to continuously treat incoming water used by ice machines, killing the bacteria in the water and ice-making path. EcO<sub>3</sub>Ice creates a small, but effective amount, of aqueous ozone – nature's favorite sanitizer – that continuously treats ice machine interiors, storage bins, remote bins and drains. This process kills over 99.9% of a wide range of bacteria, germs and pathogens including Legionella, E. coli, Salmonella and others, and also reduces mold and biofilm buildup.

"We want to support our area's Vets, especially those requiring hospitalization," says Wayne Lieberman, CEO of Enozo Technologies, Inc. "We want to help significantly improve the hospital's ice machine sanitation to further protect all Vets and employees at this facility. During this time of uncertainty, helping our healthcare workers and hospital patients feel more secure about their health and safety is something we know we can help with...so we are."

The C.W. Bill Young department of Veterans Affairs Medical Center will work with Enozo's installation team to get the EcO<sub>3</sub>Ice machines up and running in the facility as quickly as possible.

###

### **About Enozo Technologies, Inc.**

Since 2010, when the company first took shape as Electrolytic Ozone, Inc., Enozo Technologies, Inc. has been utilizing the best-of-the-best in science, technology and experience to change the world for the better. The mission is to develop a solution to replace toxic chemicals for sanitizing and cleaning in industrial and home applications to revolutionize health and safety for all. Today, Enozo Technologies, Inc. is focused on harnessing that core mission combined with the power of nature to prevent future illness and death.
