

**Puerto Montt, 02 de Junio de 2022**

## **CERTIFICATE**

In our company EULEN Chile S.A, one of our main areas of responsibility is to serve a large part of the salmon industry (Chile is the second country in the world in this industry and they are mostly concentrated in my area). The tests we have carried out with ENOZO have been very satisfactory and allow our clients to avoid the handling of some chemicals such as chlorine and quaternary ammonium in their different processing plants, thus avoiding the internal transport, storage and handling of said chemicals. and thus significantly lower their risk matrix. Therefore, we are planning the incorporation of ENOZO as part of the improvements to be implemented in the 2022-2023 period.

Atentamente.

**Jorge Valdés Rivera**
